WELCOME TO your SOUND Journey

A journey to find more calmness, focus and relaxation. A journey to discover fresh, energizing sounds through instruments designed for anyone to explore, create and feel.

our vision

In the hectic chaos of the modern age, it's easy to lose yourself in the stress of everyday life. Restlessness has become a universal companion, whispering in our ears, urging us to keep going, keep doing, and searching for something just out of reach. Within this discord of the external world, there exists a profound remedy: Sound.

Sound has the power to bridge the gap between the outer chaos and our inner world, offering us a pathway to peace and serenity. We want to embrace the power of sound together and start truly listening again. To rediscover our inherent sound.

Our vision includes ...

- ... Creating moments of mindfulness and well-being in times of unrest, when everyone is always expected to perform.
- ... Allowing ourselves to slow down and reconnect with our inner world.
- ... Spreading our instruments with their positive effects all over the world to make them accessible to as many people as possible, no matter their age, gender, health, or wealth status.
- ... Reaching places with sound where words do not.
- ... Inspiring people to get creative and explore their own intuition.
- ... Supporting kids in finding joy through experimentation, strengthening their focus, concentration, and motor skills.
- ... Forming a way of communication through sounds for people who cannot express themselves verbally.
- ... Supporting all kinds of processes – physical, mental, and emotional.

our Brand Ambassadors

Get to know the people who represent our brand with their energy, creativity and authenticity every day. Together, we want to spread the vision of sound as an universal message to the world. In May 2024, our first Brand Ambassador training took place and these are the very first Brand Ambassadors that were officially trained by us.

A Short Guide to Crystal Singing Bowls

Crystal singing bowls create a soothing and uplifting resonance that invites people to enter a deep state of peace and relaxation when listening to them. There are a variety of different types of crystal singing bowls, ranging from frosted bowls to clear singing chalices, and each type offers a distinct sound and atmosphere that enriches the journey created in a Sound Bath.

Frosted Singing Bowls

Frosted crystal singing bowls provide a rich spectrum of sound that can build to fill a large hall when playing for a crowd, or be played softly in a cozy studio for one-to-one Sound Bath. The frosted edge is what allows the sound of this type of crystal singing bowl to be so versatile. Frosted bowls come in a variety of octaves, so that you can create deep and calming tones when using bowls in the 3rd octave, or a joyful and uplifting soundscape when playing bowls in the 4th or 5th octave.

My favourite mallets for frosted singing bowls are the Crystal Singing Bowl Mallet made of rubber (see page 16), to create a clear and crisp tap when striking the bowl, or the Silicone-coated Rod (see page 16) for creating a smooth and relaxing sound when playing around the edge of the bowl.

Exploring Frequencies

Crystal singing bowls are also available in a variety of different frequencies. 440 Hz is the standard tuning of music, and many bowls are tuned to this, meaning that the tone of crystal singing bowls in this tuning is likely to fit in with most musical instruments you already have at home. 432 Hz is a popular frequency used for relaxation and meditation, and many sound healing practitioners choose to use crystal singing bowls in this frequency for this reason when delivering Sound Baths. Sonic Energy's Planetary Crystal Singing Bowls are tuned to the frequencies based on the calculations of Hans Cousto, who discovered the frequencies of each planet. Working with planetary bowls adds a layer of symbolism and storytelling to your work, as you can share the mythology and meaning behind that planet in the sound journeys you create. Solfeggio crystal singing bowls are tuned to specific frequencies which have been used in both ancient and modern meditation practices that are known to have many different benefits for body, mind and spirit.

Working with Chakras and Colours

When creating a Sound Bath, many people like to include the yogic chakra system and the meaning of each chakra as a way of choosing which sounds to include. When working with the chakras and crystal singing bowls, many people use this understanding:

- C = Root Chakra (red)**
- D = Sacral Chakra (orange)**
- E = Solar Plexus Chakra (yellow)**
- F = Heart Chakra (green)**
- G = Throat Chakra (sky blue)**
- A = Brow Chakra (indigo blue)**
- B = Crown Chakra (purple)**

If you enjoy working with colour in your practice, the marble-frosted crystal singing bowls and colour-frosted crystal bowls make a perfect addition to your sound journeys, as each note is colour-matched with the associated note and chakra.

Essence Crystal Singing Bowls and Chalices

The Essence Crystal Singing Bowls have a smooth, polished finish which allows the sound created by these bowls to have a very clear and long-lasting resonance that is tranquil and relaxing. The chalice variety of these bowls allows you to direct the sound around the room, as you can also pick these bowls up and move them in your hand whilst you play, creating a hypnotic, cocooning effect. My favourite mallets to use with these bowls are the Suede Resonant Mallet (see page 28), for creating a clear and crisp tap when striking the bowl, and the Crystal Silicone Rod (see page 16) creating a smooth and relaxing wave of sound when playing around the edge of the bowl.

About Harriet

With 10 years of experience in the wellness industry, Harriet has held hundreds of events across the globe and is known for hosting some of London's best well-being events. Her lifelong passion for wellness and meditation is central to her work and this passion is infused into every project and service that she provides. She is proud to have collaborated with some of the world's most reputable brands and businesses. THE STORY BEHIND

SOLFEGGIO FREQUENCIES

Solfeggio – a term originally rooted in music theory – has found a significant place in Sound Therapy. The effects and magic of Solfeggio frequencies are perceived in various ways, each offering a unique connection to these ancient tones.

The Solfeggio frequencies form a six-tone scale originally used in religious music during the 11th century, with references to these frequencies dating back to early biblical times. These frequencies represent distinct tonal qualities that are believed to support and enhance various aspects of mental and physical well-being. Despite their powerful effects on the body and mind, Solfeggio frequencies may not always sound harmonious to the modern ear. This is because they do not follow the traditional Western musical scale, which is based on equal temperament tuning.

As a result, they can feel unfamiliar or dissonant, as they operate outside the conventional frameworks of intervals and harmonies, following a more ancient, natural tuning.

The initially six well-known Solfeggio frequencies were complemented by three additional tones, completing the now nine-part scale, as follows:

In Sound Therapy, listening to these frequencies is associated with healing effects on the mind, body, and spirit, helping to restore balance. The exact mechanism by which Solfeggio frequencies achieve their effects is not yet scientifically proven. Nevertheless, instruments resonating with these potent frequencies, when paired with purposeful intention and a tranquil atmosphere, have the potential to create a profoundly soothing and harmonizing effect on our well-being.

A Love called Singing Bowls

Singing bowls are fascinating instruments that can be used for everything from yoga and meditation to massages, beauty treatments, music, and even in kindergartens and schools.

My journey with them began in 2014 during a Silent Meditation Retreat in a Nepalese Buddhist Monastery, where one of the monks used the same singing bowl every morning to end the silent meditation. I could feel an intense resonance in my body, and as soon as I came back home, I started researching but didn't get the results I was expecting.

A couple of months later, I came across the singing bowls of Sonic Energy during the Meini Percussion Festival, and a small set of four Cosmos singing bowls marked the beginning of a deeper exploration. I took some courses but soon realized I needed to do my own research to truly understand these instruments.

Here's what I learned

First and foremost: quality and condition are crucial. It's essential that singing bowls are of excellent quality, especially when we seek healing effects from them. Not every bowl is capable of producing the resonances needed for healing, which is why we must carefully research and choose wisely. As a teacher, I often encounter a variety of bowls brought by my students to courses. We measure their frequencies and tones, and many are surprised to discover that the bowl's true characteristics differ from what they initially thought or why they purchased it.

Sonic Energy brought reliable quality to the European market, making it possible to buy online with confidence. While I honor the ancient legacy of bowls, I embrace a modern approach, blending tradition with today's fast-paced world.

Yin & Yang aspects of Singing Bowls

The singing bowl represents the feminine (yin), while the mallet is the masculine aspect (yang). Every time we strike the bowl, we are co-creating harmony and balance, symbolizing new life and fulfillment. Each bowl has a unique "personality," and surprisingly, some don't always sing, which is why I teach my students to carefully listen to their instruments. If you listen closely, you'll learn that each bowl communicates.

As soon as you enter the energetic field of a person or yourself, observe how the sound and resonance develop. If the sound fades quickly, focus on that area until the resonance deepens. This indicates the body is relaxing, shifting from disharmony to balance. Therapeutic bowls like the Cosmos or Energy series (see pages 25, 26) help to reset the body with their rich vibration. This practice can also be helpful for mental well-being when played softly near the head.

I don't follow a strict structure. Over the years, I've developed my own approach, using bowls flexibly based on the client's needs and the bowl's response. Each session becomes a creative, personalized healing experience because everyone is different.

I still work daily with my first Cosmos bowls, along with two Universal series bowls. Since the Origin series (see page 27) came out, I've integrated them for their clear meditative sound. Two years ago, I added a 13000 g Grounding Bowl (see page 27), which everyone loves.

Singing bowls are pure love, revealing their secret world to us and enriching our lives. Enjoy your journey with your favorite singing bowls!

Enhance Your Relaxation Practice with the Transformative Power of Sound

Yoga Nidra, also known as "yogic sleep", is a state of conscious relaxation induced through a guided meditation practice. This form of meditation brings about deep physical, emotional, and mental relaxation.

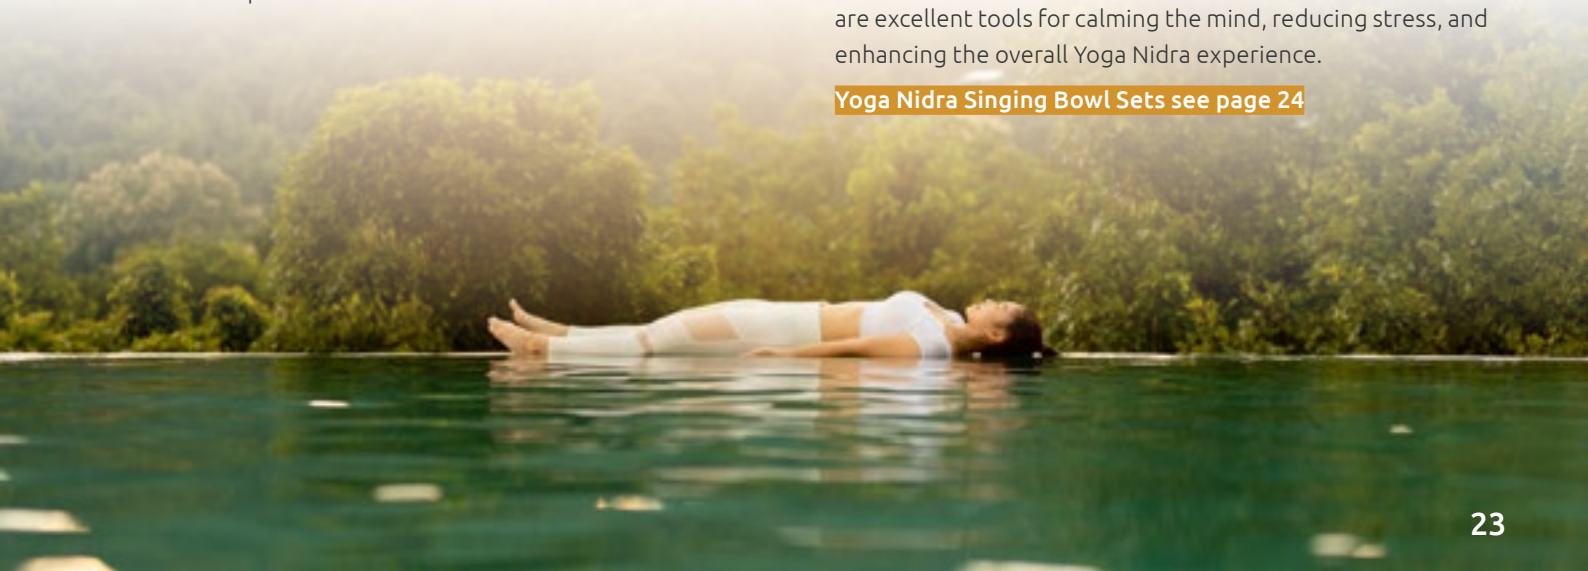

During Yoga Nidra, the mind is led through various mindfulness exercises, including awareness of physical sensations, breathing techniques, visualizations, and feelings of inner peace.

The goals of Yoga Nidra range from promoting relaxation and stress reduction to supporting self-healing and spiritual growth. Regular practice can improve overall well-being, calm the mind, and relieve emotional stress. Supported by the transformative power of sound, this experience becomes even more profound.

The Sonic Energy 3-piece Yoga Nidra Singing Bowl Set is handcrafted in India from a special bronze alloy, ensuring a high-quality sound experience. These three singing bowls can be used individually or together to deepen your Yoga Nidra practice, creating a soothing, immersive atmosphere. Their rich tones guide you into a state of deep relaxation, making them the perfect companion for achieving balance and inner peace during meditation.

For a more profound experience, the 5-piece Singing Bowl Set expands the sound range, offering a more dynamic and versatile meditation session. The additional bowls provide a variety of tones tailored to each phase of practice, fostering deeper relaxation and smoother energy flow. Whether used in personal meditation or group sessions, these sets are excellent tools for calming the mind, reducing stress, and enhancing the overall Yoga Nidra experience.

SOUNDSCAPE GONGS

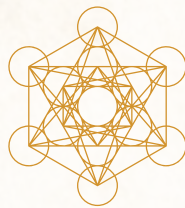

In the serene Franconian landscape, a ripple begins across still lakes, growing as it moves through the quiet hills. The air thickens with energy, and soon, the valleys hum in harmony with the earth. This is the sound of our Soundscape Gongs – deep, resonant, and alive – awakening the senses and filling the space with a calming yet powerful presence.

Sonic Energy Soundscape Gongs are meticulously crafted in Gutenstetten, Germany, producing a rich, complex soundscape that comes to life with even the gentlest touch.

The design also includes an easily playable edge, providing enough space for the mallet to strike. With a polished surface, these gongs not only sound impressive but also have a luxurious shine. Adorning this gleaming surface are detailed symbols, each carrying its own meaning and enhancing the visual appeal of the gong.

The Flower of Life represents the origin of all things through sacred geometry. The collaboration of numbers, shapes, and vibration belongs to the oldest myths of mankind. It is the strive to connect with our origin and to understand ourselves.

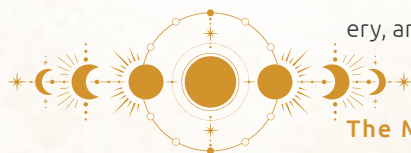

Metatron's Cube represents the flow of energy and the harmony of geometric patterns in the universe. It embodies balance, creation, and the interconnectedness of all things. This ancient symbol is believed to hold the key to understanding the structure of the cosmos and the unity between the physical and spiritual realms.

The Om Lotus symbolizes the union of spirituality and enlightenment. The lotus flower, rising from the mud to bloom beautifully, represents purity and spiritual growth, while the Om sound signifies the essence of the universe. Together, they embody the journey towards self-realization, inner peace, and the connection to the divine.

The Spiral symbolizes growth, evolution, and the journey of life. Through its ever-expanding form, it represents the continuous cycle of development and transformation. This ancient symbol reflects the quest for knowledge, self-discovery, and our connection to the universe.

The Moon Phases symbolize the cycles of change and renewal in life. As the moon transitions from new to full and back again, it reflects the ebb and flow of our experiences and emotions. This ancient symbol embodies the rhythm of nature, reminding us of the constant process of growth, transformation, and the passage of time.

The Solar System represents the intricate dance of celestial bodies, each orbiting around the sun. This cosmic arrangement symbolizes balance and harmony. It reflects humanity's quest to understand our place in the universe and the relationships between the planets, stars, and the greater cosmos.

Working with

TUNING FORKS

Tuning Fork Therapy is a gentle yet effective method for harmonizing the body and mind, promoting inner balance and well-being. By transmitting pure frequencies to specific points on the body, this therapy helps relieve muscle tension, engage the nervous system, and work with subtle energies to facilitate deep relaxation and restoration. Its lasting benefits address both physical and energetic imbalances, contributing to sustained well-being.

Tuning forks are used across several holistic healing systems. In **Traditional Chinese Medicine (TCM)**, they are applied to acupuncture points to stimulate the flow of Qi through the meridians, aligning with the Five Elements for physical and emotional harmony. In **Acupuncture or Meridian Therapy**, tuning forks offer a non-invasive alternative to needles, enhancing energy flow and clearing blockages. In **Sound Healing**, specific frequencies restore the body's natural vibrations, supporting overall balance. **Biofield Tuning** targets the body's electromagnetic field, using tuning forks around the body to clear energetic disturbances.

Balancing the Chakras

In the **Yogic Chakra System**, tuning forks balance the energy of the seven chakras, each of which is connected to a specific theme, color, symbol, and frequency. By combining the vibrations of the corresponding tuning fork with focused intention, one can help restore harmony, improve energy flow, and promote healing.

Elevate Tuning Fork Treatments with Vibration Feet

The Meinl Sonic Energy Tuning Fork Vibration Feet enhance the effects of tuning forks by increasing the contact area with the surface, amplifying the vibrations. With their ability to treat not only specific points but larger areas, they have found their place in various fields such as massage, cosmetics, and therapy.

Tuning Fork Vibration Feet see page 48

Tuning Fork Therapy for Pets: Harnessing Frequency for Wellness and Balance

Not only do humans benefit from the healing power of frequency work with tuning forks, but our four-legged companions and pets can also experience increased well-being and balance through this method. Animals, with their natural sensitivity and intuition, are especially receptive to these techniques. Since they often perceive stimuli far more intensely than we do, it's important to always use the vibrational feet when working with tuning forks to ensure their comfort. Animals will intuitively show whether the chosen frequency is working for them, making it easier to adjust and find the most beneficial vibration. While you can start on your own to see how your pet reacts, it's recommended to seek guidance from a professionally trained animal healer specialized in Tuning Fork Therapy when addressing more significant issues.

Tune Your Mind: Unlocking the Power with **BINAURAL THERAPY TUNING FORKS**

Imagine being able to tune your mind like a musical instrument, effortlessly shifting from deep relaxation to heightened focus, or even slipping into a meditative state, simply by listening to certain sounds. This is the promise of binaural effects, a fascinating auditory phenomenon that can influence our brain wave activity.

By using Binaural Therapy Tuning Forks in conjunction with the Master Fork 128 Hz, we can create this effect on our own. When the forks are struck and held near the right and left ear, the brain detects the difference between the two frequencies, perceiving a third frequency that guides you into the desired brain wave state.

Understanding how different brain wave states can influence and shape our experience and reality, plays a fundamental role in our journey of self-discovery and personal development.

These are the Five Main Types of Brain Waves:

Gamma – 30 to 100 Hz Where all ideas grow

Gamma brain waves are the fastest and are associated with high concentration, focus, creativity, and heightened alertness.

Beta – 12 to 30 Hz Sharp and focused glow

Beta brain waves heighten our alertness and analytical abilities. Typically, our brain operates at this frequency during daily activities that involve concentration, thinking, and excitement.

However, high beta waves can also lead to anxiety, stress, and restlessness. They are often associated with the "survival mode" that many of us experience constantly.

Alpha – 8 to 12 Hz Calm and mindful peace

Alpha brain waves are linked to a relaxed, calm state of mind. They promote relaxation while awake, reduce stress, and improve learning.

Theta – 4 to 8 Hz Creative flow

Theta brain waves are connected to a deeper state of relaxation, enhancing creativity and intuition while lowering stress and anxiety levels. This is where the door to our subconscious mind opens.

Delta – 0,5 to 4 Hz Deep and dreamless sleep

Delta brain waves are the slowest frequency and are associated with deep, dreamless sleep. Our minds and bodies experience their most profound rest and rejuvenation here.

Tapping into different brain wave states can be a powerful tool for enhancing emotional well-being and achieving greater independence from external influences. These states act as a gateway to our subconscious mind, where we can tap into our inner resources and explore our inner world.

Discover Your Intuitive Play

Intuitive play and music-making allow us to express our emotions and thoughts freely, without reservations. This approach to music doesn't require extensive musical knowledge or training; some instruments enable us to start playing without years of practice, inviting us to explore creativity in its purest form.

Find Your Inner Rhythm

Intuitive playing thrives on a good sense of rhythm. However, achieving this doesn't necessarily require long-term training. Simple rhythm exercises, like clapping or tapping out beats on a tabletop, can provide a solid foundation to help you enter a natural flow. These basic practices are often enough to connect with the rhythm within and let the music guide you.

The Essentials of Intuitive Play

To fully embrace intuitive play, you need just two things: an instrument and trust – trust in yourself and the process. Here are a few key aspects to consider as you dive into this creative journey:

- » **Practice Makes Perfect:** While intuitive play is about freedom, regular practice helps deepen your connection with your instrument and your inner rhythm.
- » **Inspiration and Exchange:** Seek out inspiration from other musicians or artists, and don't hesitate to share your own experiences. The exchange of ideas can open new avenues in your intuitive play.
- » **Preserve the Joy of Playing:** Above all, remember that the joy of playing should remain at the heart of your musical journey. Keep it fun, light, and engaging – this is where true creativity flourishes.

By embracing intuitive play, you open the door to a world of spontaneous musical expression. Whether you're a seasoned musician or a complete beginner, this approach allows you to connect with your emotions, explore your creativity, and enjoy the pure joy of making music.

The ideal instruments for beginners, intermediate and advanced players:

A SOUND JOURNEY FROM MORNING TO NIGHT

Introducing our collection of Cosmic Bamboo Chimes in 432 Hz, each crafted to resonate with the unique magic of the day's different times – Morning, Day, Evening, and Nighttime.

AURORA captures the essence of dawn, the moment when the world awakens from its slumber. This chime embodies the gentle whispers of the morning breeze and the soft glow of the first light, creating a melody that promises new beginnings.

SOL reflects the vibrant energy of midday when the sun is at its zenith. This chime echoes the warmth and vitality of the day, its tones bright and uplifting, filling the air with a sense of possibility and the invigorating pulse of life.

LUNA embodies the tranquil essence of the evening, when the sun meets the horizon, dipping the sky in warm colours. As the moon rises to take its place in the night sky, this chime's melody is gentle and reflective, a harmonious blend that invites contemplation and a peaceful transition from day to night.

STELLA captures the mystical atmosphere of nighttime, under the watchful gaze of the stars. Its sound is delicate and ethereal, like the distant twinkle of starlight, offering a sense of calm and connection to the infinite expanse of the night sky.

Each chime is designed to resonate with the spirit of these special moments, bringing the magic of the day's natural rhythm into your space.

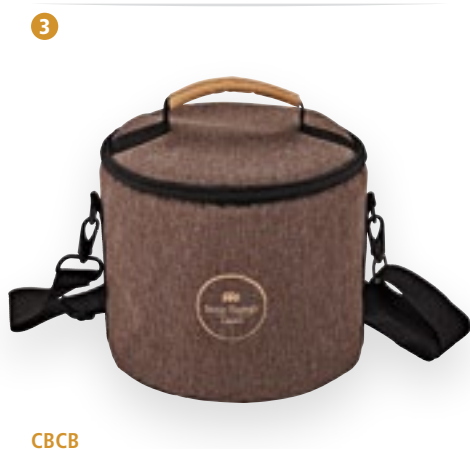

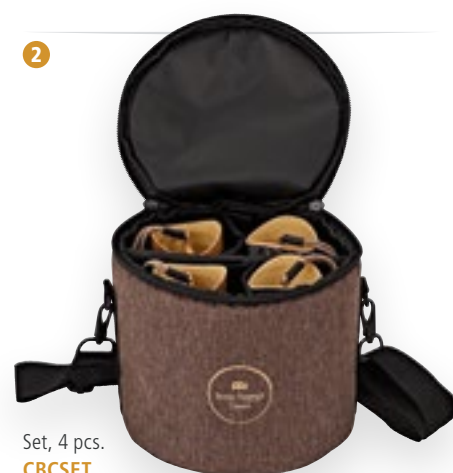

The Frequency of 432 Hz:

A Harmonic Connection to Nature

The frequency of 432 Hz is often referred to as the "harmonic frequency" or the "natural tuning" due to its perceived alignment with the vibrations of the universe, nature, and the human body. Many musicians and sound healers believe that music tuned to 432 Hz can create a calming and meditative experience, promoting relaxation and well-being.

THE SOUND OF NATURE

Whether it's birdsong, flowing water, rustling leaves, or ocean waves – the sound of nature is widely recognized for its calming and therapeutic effects. These soothing sounds help reduce stress by lowering cortisol levels, easing anxiety, and creating a profound sense of calm.

Nature's melodies offer more than just a pleasant background noise. They inspire musical instruments that mimic and amplify these soothing sounds.

From Birds Chirping to Mountain Streams Gently Flowing – Seed Shakers & Chimes

Shaker instruments have ancient roots, with their origins tracing back to early indigenous cultures around the world. Traditionally crafted from natural materials like seeds, nuts, gourds, or bones, shakers were not only musical tools but also held spiritual significance.

In shamanic work, they are often used to invoke the rhythms of nature and to guide journeys of healing, meditation, and trance. The repetitive, grounding sound of shakers helps create a sacred space, aligning the body and mind with natural energies and aiding in the connection with the spirit world. Their rhythmic pulse mirrors the heartbeat of the Earth, making them an essential tool in many shamanic rituals.

A variety of different nut shells and sizes offers an equally wide range of sounds. The smaller shakers evoke the gentle rustling of leaves, while the larger ones resemble the fluttering of a flock of birds. The Pala or Kenari Chimes create a sound reminiscent of the rushing waters of a mountain stream. (See page 68)

From Gentle Drizzle to Heavy Rainfall – Rainmakers, Rain Sticks and Thunder Drums

Instruments that mimic rain and thunder, like Rainmakers, Rainsticks, and Thunder Drums, can have a powerful cleansing effect. The soft, rhythmic drops of a Rainmaker imitate summer rain, clearing the mind and washing away stress. A slowly turned Rainstick adds the calming flow of cascading water, while the deep rumble of a Thunder Drum channels the grounding energy of a distant storm. The interplay of these instruments can feel like a force of nature. When used in the right context, all pent-up energy can be released, much like a summer thunderstorm breaking through the heat.

(See page 70)

The Soothing Sound of the Ocean – Wave Drums

Wave Drums capture the calming essence of ocean waves, allowing you to experience the rhythmic ebb and flow of the sea wherever you are. As the beads inside the drum gently roll back and forth, they create the sound of waves lapping at the shore, bringing a sense of relaxation and peace. Perfect for meditation, sound therapy, or simply unwinding, Wave Drums transport you to the tranquil coast, where the soothing sound of the ocean washes away stress and brings balance to both mind and body. (See page 75)

Echoes of Nature – Didgeridoo

The sound of a Didgeridoo is like the deep, resonant hum of wind moving through ancient caves, swirling and echoing in rhythmic waves. It vibrates like distant thunder rolling across the horizon, steady and powerful, yet grounding. At times, it mimics the low rumble of the earth itself, as if the ground beneath you is alive, breathing in long, slow pulses. The didgeridoo's tones can shift like the call of a distant animal, or the rhythmic heartbeat of the wilderness, creating a primal connection to nature's raw, untamed energy. While these sounds affect us on a deeply mental and emotional level, learning to play the Didgeridoo can also improve your physical health. (See page 71)

FIND YOUR OWN RHYTHM IN COMMUNITY

The Magic of Drum Circles

Drum circles offer a unique space where individuals come together to connect through rhythm and sound. In these circles, the simple act of drumming transforms into something magical, as personal expression blends into a collective beat. It's a space where everyone, regardless of skill level, finds their rhythm and contributes to a shared musical journey.

Drum circles create an environment where the barriers between people dissolve, replaced by the pulse of the rhythm shared by all. Each beat becomes a conversation, a heartbeat of the community, where everyone has a voice, and every sound matters. In this sacred space, time seems to slow down, and participants often find themselves more deeply connected – to themselves, to others, and to something greater beyond words.

The experience can be both invigorating and deeply meditative, as the rhythms become a form of expression that taps into something primal. The simple, repetitive beats can help release stress, spark creativity, and allow participants to let go of inhibitions. There's no right or wrong in a drum circle – just the freedom to create, listen, and respond.

To fully experience the magic of a drum circle, it's important to enter with an open mind. Let go of any expectations, and allow yourself to actively listen to the rhythms around you. Rather than putting pressure on yourself to perform or play perfectly, focus on the joy of participating and connecting with others. The beauty of a drum circle lies in its spontaneity and collective energy – it's a space for everyone to simply enjoy, be present, and find their own rhythm within the community.

ENHANCING WELLNESS – NOT A MEDICAL ALTERNATIVE

Some of our products are mainly used to strengthen the self-healing process and to find and release energetic blockages. With the correctly applied product, physical and psychological well-being often can be increased, but not guaranteed.

Please note that sound work can be a supportive practice for a lot of processes, but it is important to recognize that it is not a medical alternative. Every individual is unique, and what works for one person may not work for another.

The use of our products is in no case a substitute for a medical or psychotherapeutic treatment or diagnosis. Contact your health-care provider immediately if you suspect that you have a medical problem.

Our instruments are great tools to support your meditation and getting into a relaxed state.
